Rules

- All persons flying must obey safety rules, all flying must be done towards the river, never shall a plane be flown behind flight line or anywhere near active full scale runway. When a full scale is in the pattern, we must either stay grounded or away from the flight path of the full scale aircraft. This is first and foremost a full scale airport, we must stay clear of full scale operations. Please check with club safety officer for a full brief on procedures.
- All potential new members must fly only with a current member unless otherwise stated by a club officer.
- Ona RC Club retains the right to terminate membership at any time for any reason with vote from current membership with dues refunded.
- Please respect your fellow modelers, we will not tolerate any disrespect to fellow members.
- Must obey AMA rules and regulations at all times.
- Planes must be started and stopped outside of pit area, never taxi a plane back into the pit area.
- We don't mind having multiple aircraft flying in the air, but please check with whoever is flying before taking off. Some people aren't comfortable flying with others, this is especially true of helicopters and faster aircraft.
